

Environmental Analyst

position summary

In this full-time position the Environmental Analyst will support a team with environmental permit acquisitions, environmental review, and construction/operation compliance management for energy infrastructure projects. This position requires technical knowledge or the willingness to learn federal, state, and local permitting regulations to support energy-related projects.

responsibilities

The Environmental Analyst is responsible for the following:

- Assist Project Managers with tasks associated with permitting and compliance services to the energy sector and more specifically natural gas projects.
- Support projects that involve analysis of the environmental impacts of proposed energy projects, including analyses to support development of Environmental Impact Statements and Environmental Assessments.
- Conduct onsite monitoring at active construction sites, including soil screening and soil and/or groundwater sampling.
- Review projects to assess the potential to encounter contaminated soil and/or groundwater.
- Conduct stormwater compliance inspections and complete inspection reports.
- Support wetland, waterbody and/or cultural field surveys, including subcontractor communication, scheduling, and associated internal and external reporting.
- Supporting administrative functions as needed, including document production and technical editing of large, detailed scientific documents.
- Work with internal Project Managers and external clients in a manner that is consistent with Merjent's reputation for excellence.

qualifications and experience

The successful candidate will have the following qualifications and experience:

- B.A. or B.S. in environmental science or environmental studies, environmental engineering, geology, biology, or closely related field.
- 0-3 years of environmental permitting experience, with preference to work in the natural gas sector
- 0-3 years of experience, or familiarity with the National Environmental Policy Act, or permitting processes through the US Fish and Wildlife Service, Federal Energy Regulatory Commission, State Historic Preservation Offices, or other federal, state, or local regulatory agencies.
- Knowledge, interest, and/or experience in hydrology, biology, or other field experience is a plus.
- Experience with soil sampling, working on an active construction site, and/or a current 40-hour HAZWOPER certification is a plus.
- Strong self-starter tendencies and excellent organizational/task management skills.
- Ability to adapt quickly and work well under pressure, both in large teams and one-on-one.
- Ability to work independently with minimal supervision.
- Ability to analyze, organize, and interpret data from multiple sources and translate that information into direct, easy to understand written deliverables.
- Must be detail-oriented with excellent problem-solving skills.
- Excellent oral communication and technical writing skills. Proficient at the Microsoft suite of products (Word, Excel, PowerPoint); technical editing experience a plus.
- Must be willing to travel domestically as needed (20-40%), depending on the needs of the project. Local field work is anticipated to be required.

Candidates interested in applying should submit a completed Application for Employment to merjent.applicantpro.com.

Merjent, Inc. will consider all applications without regard to race, marital status, sex, age, color, religion, national origin, veteran status, disability or any other characteristic protected by law.
