

# PSM/RMP Lead Consultant

## position summary

In this full-time, exempt position, the Process Safety Management / Risk Management Plan Lead Consultant will lead process hazard analyses (PHAs) and compliance audits pursuant to OSHA's process safety management (PSM) and USEPA's Risk Management Plan (RMP) regulations as well as assist clients with other safety and environmental compliance tasks, as necessary. PSM/RMP and PHA experience is desired.

## responsibilities

The following responsibilities are general duties that an employee in this position may be required to perform. The actual duties required of this position will vary. The PSM/RMP Lead is responsible for the following:

- Develop and maintain relationships with clients, agency representatives, and internal team members.
- Manage PHAs and compliance audits from start to finish. This may include coordinating site visits with clients, preparing materials prior to visit, leading audits and PHAs at the facilities, developing draft and final reports, and providing technical guidance for recommendations.
- Manage client communications and deliverables for various tasks.
- Task management of quick-turnaround projects from proposal to product deliverable.
- Work closely with Project Managers to ensure client satisfaction and maintain Merjent's reputation for excellence.
- Stay up-to-date on PSM and RMP regulations and industry trends and communicate changes to Project Managers and clients.

## qualifications and experience

The successful candidate will have many of the following qualifications and types of experience:

- B.S. or advanced degree in environmental engineering, industrial hygiene, or closely related science.
- Minimum of 3 years' experience consulting, operating, or managing technical work.
- Ability to distill complex subjects and communicate them effectively.
- Ability to lead groups of people with diverse experience and skill sets.
- Experience task managing while producing high quality results.
- Strong technical writing and oral communication skills with excellent attention to detail.
- Strong project management, problem-solving, and analytical skills.
- Ability to effectively manage multiple, fast-paced projects and budgets, and meet deadlines.
- Ability to read, analyze, and interpret business contracts, government regulations, technical procedures, construction drawings, and industrial processes.
- Ability to adapt quickly and work well under deadlines.
- Experience/knowledge of PSM and RMP desired.
- Previous consulting experience preferred.
- Dust hazard analysis experience a plus.

## working conditions

The successful candidate will have many of the following qualifications and types of experience:

- Remote work or office environment in Merjent's Minneapolis office.
- Ability to travel nationally as necessary 25-50% of time.
- Flexible work schedule with the potential to work less than 40 hours per week.

Candidates interested in applying should submit a completed Application for Employment to [merjent.applicantpro.com](http://merjent.applicantpro.com).
