

EHS and Air Quality Consultant – Entry Level

position summary

In this full-time position, the EHS and Air Quality Consultant will join the Environmental, Health, and Safety team to perform air and water permitting, dispersion modeling, environmental compliance tasks, and safety-related services for biofuels, industrial, and power-sector clients. This position requires a desire to work on multiple tasks at once, an aptitude for time management, and a willingness to learn on the job.

responsibilities

The following are general duties that an employee in this position may be required to perform. The actual duties required of this position will vary.

- Under the direction of a Project Manager, complete tasks in many facets of environmental permitting and compliance services, including air quality, water, waste, and safety programs.
- Complete tasks on quick-turnaround projects and balance workload with long-term projects.
- Support projects that may include air permit applications, dispersion modeling, environmental or safety plan preparation, environmental reporting, and environmental review analyses.
- Assist with supervision of stack testing subcontractors, managing task due dates and technical deliverable development.
- Work closely with Project Managers to ensure client satisfaction and maintain Merjent's reputation for excellence.

qualifications and experience

The successful candidate will have many of the following qualifications and types of experience:

- B.S. in environmental engineering, environmental science, or closely related science.
- Experience performing multiple tasks while producing high quality results.
- Strong technical writing and oral communication skills with excellent attention to detail.
- Effective communication skills with internal team, sub-consultants, and government agency representatives.
- Strong problem-solving, critical thinking, and analytical skills.
- Ability to read, analyze, and interpret government regulations, technical procedures, construction drawings, and industrial processes.
- Ability to adapt quickly and work well under deadlines.
- Beginning knowledge of environmental programs related to air quality, water, waste, spill response, and safety.
- Proficiency with Microsoft Office, especially Word and Excel. Experience with Visio and Access a plus.
- Experience with climate change initiatives a plus.

working conditions

- Remote work or office environment in Merjent's Minneapolis office.
- Ability to travel nationally as necessary up to 10-20% of time.
- Flexible work schedule with the potential to work less than 40 hours per week.

Candidates interested in applying should submit a completed Application for Employment to merjent.applicantpro.com.
