

Engineering Technician

position summary

Merjent, Inc. (Merjent) is seeking a highly motivated Engineering Technician to join our team of professionals. The successful candidate will work with senior engineers, project managers, and other team members at Merjent to support preparation of plans/specifications and CAD drawings and the development of design documentation for projects and tasks as assigned for gas and electric transmission, wind, solar, and other energy projects and facilities. This position will also be responsible for assisting with a variety of engineering tasks to help our clients' projects succeed.

Flexible/hybrid work arrangements are available for professionals who can work successfully in a remote work environment.

The anticipated salary for this position is between \$71,000-\$85,000, depending on qualifications and experience.

responsibilities

The Engineering Technician will be responsible for the following:

- Create and modify technical drawings by using computer aided design (CAD) software.
- Assist engineers in developing designs, reports, exhibits, and construction documentation.
- Collect data and analyze results from multiple sources, sometimes with limited information.
- Collaborate with cross-functional teams to support separate services and innovation initiatives.
- Maintain detailed records of test results, procedures, and other technical documentation.
- May require limited field work, as required.
- · Perform other duties as assigned.

qualifications and experience

The successful candidate will have the following qualifications and experience:

- Associate Degree in Engineering or a related field.
- Minimum of 0 to 4 years of work experience working in a similar role.
- Previous experience or training with CAD software and GIS (AutoCAD Civil 3D, ArcMap).
- Advanced working knowledge of Microsoft Office applications (Excel, Word, Outlook).
- Ability to read and interpret technical drawings and schematics.
- Strong interpersonal skills and ability to collaborate in a team environment.
- Effective verbal and written communication skills with the ability to write descriptive and technically accurate specifications and reports.
- Ability to take initiative with problem-solving and analytical skills.
- Valid driver's license and clean driving record to perform field work.
- Self-motivated and able to work independently.
