

Gas Pipeline Engineer – Transmission and Distribution

Salary Range: \$117,500 - \$152,500

position summary

Merjent, Inc. (Merjent) is currently seeking a skilled Gas Pipeline Engineer with experience in linear projects, including transmission and distribution, to join our dynamic team. The ideal candidate will have a strong background in gas engineering principles and practices, with a specific focus on the design, analysis, and implementation of transmission and distribution projects. This role requires a blend of technical expertise, project management skills, and a commitment to safety and quality standards. The successful candidate will assist in producing a variety of engineering tasks to help our clients' projects succeed by pro-actively navigating and effectively managing issues and challenges that arise.

Flexible/hybrid work arrangements are available, as Merjent promotes this for self-sufficient professionals who can work and/or learn successfully in a remote work environment. The anticipated salary for this position is between \$117,500 - \$152,500, depending on qualifications and experience.

responsibilities

The gas pipeline engineer is responsible for the following:

- Design, analyze, and oversee the implementation of pipeline projects for natural gas transmission and distribution for a variety of projects in the natural gas industry.
- Conduct feasibility studies, including route selection, material specification, and cost estimation, to ensure project viability and efficiency.
- Develop detailed engineering plans, drawings, and specifications for pipeline construction and maintenance projects.
- Coordinate with cross-functional teams, including environmental, regulatory, and construction departments, to ensure project compliance and success.
- Manage project timelines, budgets, and resources, ensuring projects are delivered on time, within scope, and on budget.
- Ensure adherence to industry standards, regulatory requirements, and company policies related to safety, quality, and environmental protection.
- Stay current with technological advancements and regulatory changes within the utility and natural gas sectors.

qualifications and experience

The successful candidate will have the following qualifications and experience:

- Bachelor's degree in Civil Engineering, Mechanical Engineering, or a related field.
- 5-9 years of progressive experience in gas engineering, with a significant focus on linear pipeline and natural gas projects.
- Professional Engineer (PE) license preferred, but not required.
- Previous experience or training with CAD software and GIS (AutoCAD Civil 3D, ArcMap).
- Strong working knowledge of Microsoft Office applications (Excel, Word, Outlook).
- Strong interpersonal skills and ability to work in a team environment.
- Effective verbal and written communication skills with the ability to write descriptive and technically accurate specifications and reports.
- Must have a valid driver's license with a good driving record.

Candidates interested in applying should submit a completed Application for Employment to merjent.applicantpro.com.
